Multi-user mode

If several users plan on working with the system independently, the license fee for using Rail-Tariff-Online during one calendar month will be calculated accordingly to the formula below:

Price = LFcalc + LFuser × NUmonth, where

LFcalc — stands for the license fee for the number of calculations made in a calendar month;

LFuser — stands for the license fee per user during a calendar month;

NUmonth — stands for the number of users during a calendar month.
